PACIFIC LIFE

Pacific Life Insurance Company

A survivorship variable life insurance policy is primarily purchased to provide death benefit protection. Additionally, owning a survivorship variable universal life insurance policy requires decisions about allocating your net premiums and policy cash values among the product's variable and fixed investment options. Work with your financial professional¹ to determine which option — or combination of options — may be right for you.

¹ In order to sell life insurance, a financial professional must be a properly licensed and appointed life insurance producer.

Survivorship variable universal life insurance generally requires additional premium payments after the initial premium. If either no premiums are paid, or subsequent premiums are insufficient to continue coverage, it is possible that coverage will expire.

Life insurance is subject to underwriting and approval of the application and will incur monthly policy charges.

Investment and Insurance Products: Not a Deposit	Not Insured by any Federal Government Agency	
Not FDIC Insured	No Bank Guarantee	May Lose Value

This brochure provides an overview of the investment options available in M Financial and Pacific Life's survivorship flexible premium variable universal life insurance product, M Vision Pacific Life SVUL.

Each variable investment option² invests in a corresponding portfolio of the DFA Investment Dimensions Group Inc.; Fidelity Variable Insurance Products Funds; Goldman Sachs Variable Insurance Trust; Legg Mason Partners Variable Income Trust; M Fund, Inc.; MFS Variable Insurance Trust; Pacific Select Fund; T. Rowe Price Equity Series, Inc.; VanEck VIP Trust; or Vanguard Variable Insurance Fund. The portfolios are managed by firms recognized in their particular fields of investment expertise.

There is a greater potential for higher returns through the variable investment options, but policy values will fluctuate with the changing market value of the underlying investment. Therefore, the actual value of any policy distribution can be greater or less than its original cost.

All investing involves risk, including the possible loss of the principal amount invested. The value of the variable investment options will fluctuate so that shares, when redeemed, may be worth more or less than the original cost. Please see the fund prospectuses for detailed descriptions of investment risks.

The fixed options, on the other hand, have guaranteed minimum interest rates, but have the ability to earn higher rates based on the company's current declared interest rate. The guarantees associated with the fixed options are subject to Pacific Life's claims-paying ability.

² Although some funds may have names or investment goals/objectives that resemble retail mutual funds managed by the fund manager, these funds will not have the same underlying holdings or performance as the retail mutual funds.

Cost-Efficient Variable Investment Options Covering Multiple Asset Classes

Every variable investment option has some degree of risk depending on what it invests in and the strategies employed. Please see page 12 for a discussion of investment style risks. However, it should not be considered a disclosure of all risks or a complete discussion of the risks.

Every variable investment option has some degree of risk depending on what it invests in and what strategies it uses. While all variable investment options are subject to market risk, some investment options may be subject to greater volatility than others. The variable investment options are not FDIC insured or guaranteed. Before investing you should carefully read the applicable fund prospectuses. Asset allocation is the process of distributing a fund’s investments among varying asset classes of investments (e.g., stocks and bonds). It does not guarantee diversification, assure a profit, or protect against loss.

Money Market Fund

Although the Fidelity VIP Government Money Market investment option seeks to preserve the value of \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund’s sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Bonds

The return and principal value of bonds fluctuate with changes in market conditions. If bonds are not held to maturity, they may be worth more or less than their original value.

International Investing

Additional risks are associated with international investing, such as currency fluctuations, political and economic stability, and differences in accounting standards.
